CONSTRUCTION METER PURPOSE: (The City may require proof of construction in the form of a current Building or Grading Permit.)

I understand that this application is for temporary water (through a construction meter) for the sole purpose of construction work at the address/location stated above. I further understand that the City has the right to remove the construction meter without prior notice if the meter is being used in an improper manner as determined by the City, and will discontinue any water service to the properties until permanent water service is established. Time period for use of construction meter will expire upon the following (whichever occurs first): 1) Six months, 2) Expiration of the permit, 3) Completion of the permitted work, or 4) Permanent water service is established. I also understand that the water supplied through the meter may be subject to frequent or indefinite interruptions at any time by the City. I also understand that I am responsible for this meter and its usage until I give proper written notification to the City that the meter is to be removed and the City has the meter back in its possession. I also understand that I will operate the meter in a responsible manner so as not to cause damage to the meter and/or the water system and agree to be held accountable for any and all damage caused from improper operation of the meter (i.e. damage from water pressure spikes caused by rotating the valve faster than one-quarter revolution every ____ second(s), failure to disconnect the hose when leaving the meter location, failure to close valve properly, etc.). A missing or stolen water meter will be assessed at the current replacement rate. Payment for the meter replacement must be made at the City office before re-installation. I also understand that by the City issuing this temporary meter, this action in no way obligates the District to provide me with permanent water service to the subject property.
